**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation “a plurality of prefabricated, flexurally stiff components that part of the fiber that are integrated with the fiber composite structure”. This limitation is unclear in that it appears that part of the limitation statement is missing. Clarification is required.

Claim 2 provides for the use of a bearing structure, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 2 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 (as far as it is definite), 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Carlson et al. (5,127,802). Carlson disclose a rotor blade comprising a fiber composite structure 11; a bearing structure 30 having graphite fibers 36 of a predetermined length which are provided with a epoxy matrix 38 and a plurality of prefabricated, stiff components 40. The Examiner notes that since the processes of claims 3-6 only disclose the structure that is disclosed in Carlson, it is the position of the Examiner that the process is inherently met by the structure as disclosed by Carlson. Further, since Applicant discloses an axial flow rotor blade and wind turbines use such rotor blades, it is the position of the Examiner that, in regards to claim 7, the wind power installation is considered intended use and the rotor blade of Carlson is inherently capable of being used in a wind power installation.
